Cyber Security Solution
Distributor

Empowering Businesses with Trusted **Cyber Security** Solutions

Delivering Advanced **Cyber Security Technologies** And
Connecting **Global Security Vendors** With
Reliable Channel Partners.

 **Pune**

■ About Us:

ArkTantra is a dedicated **Cyber Security Distribution Company** focused on delivering innovative security solutions to businesses and partners.

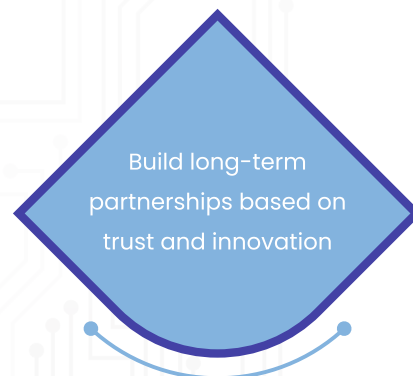

We work closely with **leading cyber security vendors, system integrators, and channel partners** to ensure reliable distribution and deployment of security technologies.

With a strong commitment to **trust, efficiency, and technology excellence**, ArkTantra helps organizations strengthen their digital security and protect critical data

■ Vision:

To become a leading cyber security distribution partner, empowering businesses with innovative technologies and building a secure digital ecosystem.

■ Mission:

■ Our Services + Technology We Distribute:

CYBER SECURITY PRODUCT DISTRIBUTION

Efficient distribution of advanced cyber security technologies.

Partner Enablement

Supporting channel partners with product knowledge and resources.

Vendor & Channel Management

Connecting global cyber security vendors with trusted partners.

Market Expansion Support

Helping brands reach wider markets through our distribution network.

■ Technology We Distribute :

- IAM (SSO / MFA / User Life Cycle Management / Adaptive & Risk Based Authentication / Passwordless Login) • PAM • DLP • MDM • Data Classification & Discovery • AD Management • User & Admin Self-Service • Password Management • Password Vault • AD Audit • AD Security & Assessment • File Server Audit • O365 Audit • Patch Management • Dark Web Monitoring • Brand Intelligence & Protection • Email Health Check • Anti-Phishing & Anti-Rogue • Anti-Spoofing • Infrastructure Intelligence • Threat Intelligence • TPRM • DMARC Enabling & Protection • Supply Chain Risk Monitoring • etc.

WHY CHOOSE US

Trusted Cyber Security Distribution

Reliable partner for leading security technologies.

Strong Partner Network

Extensive network of resellers and integrators.

Efficient Supply Chain

Timely and secure product delivery.

Expert Knowledge

Strong understanding of cyber security technologies.

Market Experience

Helping brands grow and expand their market presence.

अर्कतंत्र

Technology Partner

miniOrange is a leading Identity & Access Management (IAM) and Cyber Security solutions provider that helps organizations secure digital identities, applications, and sensitive data.

Through its partnership with **miniOrange**, ArkTantra delivers reliable identity security solutions that enable businesses to protect their digital infrastructure and manage user access efficiently.

Cyber Security Solutions:

Identity & Access Management (IAM)

- **Single Sign-On (SSO):** One login for multiple applications.
- **Multi-Factor Authentication (MFA):** Extra security through multi-step verification.
- **User Lifecycle Management (ULM) / Onboarding:** Simplifies onboarding, manages user roles, and ensures secure access control.
- **Adaptive / Risk-Based Authentication:** Dynamically adjusts security based on user behavior and risk level

Privileged Access Management (PAM)

Secures and monitors privileged accounts and sensitive systems.

Data Loss Prevention (DLP)

Prevents unauthorized access or leakage of sensitive data.

Mobile Device Management (MDM)

Manages and secures mobile devices accessing corporate resources.

Identity Governance & Administration (IGA)

Manages user identities, access policies, and compliance

Technology Partner

TechOwl is an advanced **Cybersecurity Intelligence and Attack Surface Monitoring platform** that helps organizations identify vulnerabilities, monitor digital risks, and protect critical data assets. Through its partnership with **TechOwl**, ArkTantra enables businesses to gain complete visibility into their digital infrastructure and proactively defend against evolving cyber threats. With AI-driven monitoring and real-time threat intelligence, **TechOwl** helps organizations strengthen their cyber resilience and maintain a secure digital environment.

Cyber Security Solutions:

- **Anti-Phishing & Anti-Rogue**
Detects and blocks phishing domains and malicious impersonation attempts.
- **Dark Web Monitoring**
Monitors the dark web to detect leaked credentials and sensitive data.
- **Attack Surface Monitoring**
Continuously scans digital assets to identify vulnerabilities and exposed risks.
- **Mail Health Monitoring**
Protects email systems by detecting threats and monitoring domain security.
- **Threat Intelligence**
Provides real-time insights into emerging cyber threats and attack patterns.
- **Compliance Matrix**
Helps organizations maintain regulatory and security compliance.
- **Digital Risk Management**
Identifies and mitigates digital risks across online platforms.
- **Incident Response**
Rapid response and remediation support to manage security incidents.

Technology Partner

ACTONIX is a powerful **IT Operations and Cyber Security platform** that provides complete visibility and protection across endpoints, cloud applications, file servers, and identity systems. Through its partnership with **ACTONIX**, Ark Tantra helps organizations simplify IT management while strengthening their cyber security posture. **ACTONIX** enables businesses to monitor systems, detect threats, and secure critical data through a single intelligent platform.

Security & IT Intelligence Solutions :

Endpoint Intelligence (AEI)

Monitors and automatically repairs system issues, improves performance, and predicts hardware failures across laptops and desktops.

Microsoft 365 Governance

Protects cloud data by monitoring user activity, preventing unauthorized access, and detecting data leaks in Microsoft 365 environments.

File Server Intelligence

Provides full visibility and control over file storage, detects ransomware activity, and manages sensitive data access.

Active Directory Security

Strengthens identity security by monitoring changes, auditing user activities, and ensuring only authorized access to critical systems

Key Capabilities

- Self-healing workstation management
- Real-time cloud security monitoring
- Ransomware detection and protection
- Identity and access control management
- Secure password vaults and identity protection

Technology Partner

Action1

Action1 is a modern **cloud-native endpoint management and security platform** designed for distributed workforces. It enables organizations to manage devices, patch vulnerabilities, and deploy software securely—without complex infrastructure or VPN dependencies.

Through its partnership with **Action1**, ArkTantra helps businesses strengthen endpoint security and maintain system compliance with simplified cloud-based management.

Endpoint Security & Management Solutions :

Patch Management

Automates patching for Windows, macOS, Linux, and over 600 third-party applications

Vulnerability Remediation

Detects, prioritizes, and fixes security vulnerabilities in real time

Software Deployment

Deploys and updates software across endpoints from a centralized cloud console.

Remote Endpoint Management

Securely manage and monitor devices from anywhere without network limitations.

Key Capabilities

- Cloud-native endpoint management platform
- Real-time vulnerability detection and remediation
- Automated patch management and compliance
- Secure remote endpoint monitoring and control
- Built-in reporting, scripting, and device management tools
